Course Objectives
This course is an introduction to traditional techniques and media used to produce production ready art for print, broadcast and interactive media. Each assignment will focus on understanding the media as well as addressing basic design and compositional problems, such as design, perspective, color, concept, layout and basic drawing as they relate to Illustration. All final assignments will be presented for critiques as single images top-mounted on art board.

Media use for the semester will be broken into two parts, the first concentrating on black and white techniques, and the second on color and art for reproduction. You will be graded on all visual material produced during the semester including concepts, thumbnails and roughs.

This course will be treated as a real world model. Students are expected to show up on time and act in a professional manner. Students are expected to work on projects in class during the scheduled studio time. All work must be turned in on time and meet the criteria of the assignment.

SUPPLIES
Because of the specialized nature of the materials we will be working with you will need to purchase certain supplies over and above what is normally covered by lab fees. Final versions of all assignments will need to be top mounted or matted for presentation. Keep in mind that this is a traditional media course so you may already have some of these materials, if not you can minimize your cost outlay by teaming up with others in class and buying in bulk.
