COURSE SYLLABUS

Course Description and Objective

The objective of this course is threefold. First, this course introduces students to some of the most influential philosophical thinking and problems, such as the existence and nature of God, reason and faith, the problem of evil, knowledge of external world, determinism and freewill, the mind-body problem, and the claims of morality. Secondly, students will analyze meanings in philosophical texts from diverse historical and cultural contexts from the pre-Socratic period to the twenty-first century. Lastly, students will be challenged to demonstrate knowledge of and critical thinking about philosophical concepts and the theoretical and critical principles in philosophical thinking from diverse historical and cultural contexts.
